

Clinical Trial Protocol

Iranian Registry of Clinical Trials

19 Sep 2026

Comparison of effects of Enalapril and Pseudoephedrine in the treatment of hypertrophic scar.

Protocol summary

Summary

The objective of present study is to investigate the effect of Verapamil (Calcium channel blocker) and Psuedoephedrin (antihistamine) in the treatment of hypertrophic scar. We select 60 patients with age between 15 to 60 years old who have two hypertrophic scars over two different parts of body which are the same size and shape clinically. Patients will be divided to two groups to receive Enalapril ointment 1% or pseudoephedrine ointment 1% on Hypertrophic scar in one scar and placebo on another for 6 months. We will Compare size of scar and severity of itching between two groups.

Scientific title

Comparison of effects of Enalapril and Pseudoephedrine in the treatment of hypertrophic scar.

Public title

Comparison of effects of Enalapril and Pseudoephedrine in the treatment of hypertrophic scar.

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria: Age 15-60 years, having two same hypertrophic scar in two part of Exclusion criteria: history of drug hypersensitivity to study medications, pregnancy, presence of cardiovascular diseases

Age

From **15 years** old to **60 years** old

Gender

Both

Phase

N/A

Groups that have been masked

No information

Sample size

Target sample size: **60**

Randomization (investigator's opinion)

Not randomized

Health conditions studied

1

Description of health condition studied

Hypertrophic scar

ICD-10 code

L91

ICD-10 code description

Hypertrophic disorders of skin

Primary outcomes

1

Description

burn site itching

Timepoint

monthly for following 6 months.

Method of measurement

A 5 point rating score (0=no itching, 4= very severe itching)

2

Description

Size of scar

Timepoint

monthly for 6 months

Method of measurement

In millimeter

Secondary outcomes

empty

Intervention groups

1

Description

Enalapril ointment 1% on Hypertrophic scar in one side and placebo on Hypertrophic scar in another side for 6 months

Category

Treatment - Drugs

2

Description

Pseudoephedrine ointment 1% on Hypertrophic scar in one side and placebo on Hypertrophic scar in another side for 6 months

Category

Treatment - Drugs
