The effect of combined Lemon balm-Nepeta menthoides and only Lemon balm on students' PMS (Premenstrual Syndrom) and quality of life: a ranomized controlled trial

Protocol summary

Summary

Objectives: This study aims to determine the efficacy of combined Lemon balm-Nepeta menthoides and only Lemon balm on PMS (Premenstrual Syndrom) and quality of life among students. **Design:** a double blind Randomized Controlled Trial. **Setting and conduct:** This study will be conducted in dormitories of Tabriz. Eligible women will be selected with convenience sampling and will be randomly assigned into 3 groups of 93 subjects with block sizes of 3 and 6. A person from research team not involved in the recruitment and assigning participants will generate allocation sequence using a computerized program. Opaque sealed sequentially numbered envelopes will be used for allocation concealment. **Participants:** 93 students with moderate or severe PMS. **Interventions:** First intervention group will receive Lemon balm-Nepeta menthoides Capsule, second intervention group will receive Lemon balm Capsule and third group will receive placebo Capsule. The participant will take drugs one week after the menstruation until the next menstruation bleeding for 14 days, two capsules each day for two consecutive months and they will mark severity of their symptoms in form of DRSP. **Main outcome measures:** Severity of Premenstrual Syndrom and quality of life will be evaluated before intervention and one and two months after the intervention. **Secondary outcomes** include amount of menstruation bleeding, satisfaction from treatment and the frequency of adverse events that will be assessed after intervention.

Description of health condition studied

Premenstrual syndrome

ICD-10 code

N94.3

ICD-10 code description

Premenstrual tension syndrome

Primary outcomes

1

Description

Intensity of Premenstrual syndrom symptoms

Timepoint

Two cycles Before intervention, 1, 2 cycles during intervention

Method of measurement

DRSP questionnaire

2

Description

Quality of life

Timepoint

Before and at the end of second cycle after intervention

Method of measurement

Quality of life questionnaire-SF-36

Secondary outcomes

1

Description

Amount of menstrual bleeding

Timepoint

Before intervention, first and second cycles during intervention

Method of measurement

Higham chart

2

Description

Satisfaction from treatment

Timepoint

After the end of intervention

Method of measurement

Questionnaire

3

Description

Frequency of adverse events

Timepoint

During intervention

Method of measurement

Checklist

Intervention groups

1

Description

The first intervention groups will receive only Lemon balm 500 mg capsules twice daily.

Category

Treatment - Drugs

2

Description

The second intervention group will receive Lemon balm plus Nepeta menthoides 500 mg capsules twice daily.

Category

Treatment - Drugs

3

Description

The control group will receive 500 mg placebo capsules twice daily.

Category

Treatment - Drugs
