

# Clinical Trial Protocol

## Iranian Registry of Clinical Trials

10 Jun 2026

### : Effect of warm shower and intravenous injection of hyoscine on the pain severity and duration of the active phase of labor in primiparous women

#### Protocol summary

##### Summary

**Aims:** Effect of warm shower and intravenous injection of hyoscine on the pain severity and duration of the active phase of labor in primiparous women **Design:** Single-blind randomized clinical trial **Method:** This study will be carried out in 29 Bahman Hospital of Tabriz. The subjects will be randomly assigned into three groups of 54 subjects with block sizes of 3 and 6 using computer software. In order to conceal allocation, the type of intervention will be written on a piece of paper and will be placed inside opaque sealed sequentially numbered envelopes. **Participants:** 162 nulliparous women. **Interventions:** Two intervention groups will receive hot shower and intravenous Hyoscine injection and the control group will receive no intervention. Hot shower will be firstly applied for 20 minutes at 4 cm dilation and then at 7 cm dilation. Also, Hyoscine will be injected at 4 cm dilation and then at 7 cm dilation, 20 mg in ml intravenously and diluted with 5 cc of distilled water. The duration of intravenous injection will be 1 to 2 minutes. Main outcome measures include the pain severity and the duration of active phase that will be measured respectively by Visual Analogue Scale (VAS) and partograph form.

#### Trial completion date

empty

#### Scientific title

: Effect of warm shower and intravenous injection of hyoscine on the pain severity and duration of the active phase of labor in primiparous women

#### Public title

: Effect of warm shower and intravenous injection of hyoscine on the pain severity and duration of the active phase of labor in primiparous women

#### Purpose

Treatment

#### Inclusion/Exclusion criteria

Inclusion criteria: Being primiparous; Spontaneous

starting of labor pain; Not suffering from disease; Normal fetal heart rate according to CTG; Cephalic presentation based on ultrasound; Desire to participate in study. Exclusion criteria: Having contraindication of normal delivery; Taking sedative and narcotic drugs during 48 hours prior to entering the study; Mental disorder history according to the patient's expression; Internal-surgical diseases including cardiovascular disease, thyroid disease, liver disease, kidney disease, asthma, epilepsy and etc according to the patient's expression; History of health problems in the current pregnancy according to the patient's expression; Participate in physiological childbirth classes.

#### Age

From **15 years** old to **49 years** old

#### Gender

Female

#### Phase

2-3

#### Groups that have been masked

*No information*

#### Sample size

Target sample size: **162**

#### Randomization (investigator's opinion)

Randomized

#### Randomization description

#### Blinding (investigator's opinion)

Not blinded

#### Blinding description

### Secondary Ids

empty

### Ethics committees

#### 1

##### Ethics committee

###### Name of ethics committee

Ethics committee of Tabriz University of Medical Sciences

###### Street address

Research Department of Tabriz University of Medical Sciences, Tabriz, Mohammad Reza Rashidi, Liberty Street, St. Golgasht, Tabriz University of Medical Sciences, Central Building No. 2, Third Floor, Research Department of Tabriz Tabriz

###### City

Tabriz

###### Postal code

##### Approval date

2010-09-23, 1389/07/01

##### Ethics committee reference number

93165

### Health conditions studied

#### 1

##### Description of health condition studied

Delivery

##### ICD-10 code

O80

##### ICD-10 code description

Single spontaneous delivery

### Primary outcomes

#### 1

##### Description

Labor pain severity

##### Timepoint

30 minutes after the intervention

##### Method of measurement

Visual Analogue Scale

#### 2

##### Description

Duration of active phase of labor

##### Timepoint

From 4 cm dilation to full dilation

##### Method of measurement

Partograph form in terms of minute

### Secondary outcomes

#### 1

##### Description

Duration of second stage of labor

##### Timepoint

From full dilation until the newborn expulsion

##### Method of measurement

Partograph form in terms of minute

#### 2

##### Description

Duration of third stage of labor

##### Timepoint

From newborn expulsion until placenta expulsion

##### Method of measurement

Partograph form in terms of minute

#### 3

##### Description

Birth experience

##### Timepoint

12 to 24 hours postpartum

##### Method of measurement

Birth experience scale

## Intervention groups

### 1

#### Description

The control group will receive no intervention.

#### Category

N/A

### 2

#### Description

The first intervention group will receive hot shower for 20 minutes at 4 cm and 7 cm dilation.

#### Category

Treatment - Other

### 3

#### Description

The second intervention group will receive Hyoscine at 4 cm and 7 cm dilation, 20 mg in ml intravenously diluted with 5 cc of distilled water.

#### Category

Treatment - Drugs

## Recruitment centers
