Comparison the effect of inhalation of essential oils of jasmine with distilled water on the level of anxiety and blood cortisol of patients before laparotomy

Protocol summary

Summary

The aim of this study is to evaluate the effect of inhalation of essential extraction (oil) of Jasmine on the level of anxiety and blood Cortisol of patients that are candidate for Laparotomy surgery. Inclusion criteria included: 65-15 year old, patients who are candidate for Laparotomy without a history of mental illness and no neurologic signs due to trauma, oriented to place, time and self, no history of allergy to plants, no disorder in smell, having ability to read and response to questionnaire items, no history of using steroid during 3 months ago, or those disease that increase the level of blood Cortisol. The study population are the patients who are waiting for Laparotomy in 5th Azar Hospital, 84 of them will participate in this study and they are randomly allocated in the intervention and controlled group. The subjects will sign a consent form before intervention. Intervention: before intervention, the subjects' trait anxiety will be measured by a valid questionnaire and blood level of Cortisol will be measured through 2 ML blood sample. Then, the intervention group will take 2 drops of essential oil of Jasmine through dropping on patients collar for inhalation and control group will take two drops of distilled water through dropping on patients collar for inhalation. After 60 minutes the subjects' trait Anxiety and Cortisol will be measured again. Because the maximum effect of Jasmine occurs 60 minutes after inhalation. Intervention for all patients will be done between 7:30 to 8:30 am.

Scientific title

Comparison the effect of inhalation of essential oils of jasmine with distilled water on the level of anxiety and blood cortisol of patients before laparotomy

Public title

Jasmine impact on the levels of anxiety and cortisol exposure of patients to the operating room

Purpose

Supportive

Inclusion/Exclusion criteria

Inclusion criteria: 65-15 years old, patients who are candidate for laparotomy without a history of mental illness and no signs of trauma to the brain, alert to place, time and self orientation, no history of allergy to plants, no disorder in smell, having ability to read and response to questionnaire items, no history of using steroid during 3 months ago, or those disease that increase the level of blood Cortisol. Exclusion criteria: Patient's intolerance due to Jasmine extraction, patient transmission before the intervention, the patient withdraw from the study, and the patients with anxiety or depression disorders.

Age

From **15 years** old to **65 years** old

Gender

Health conditions studied**1****Description of health condition studied**

Anxiety

ICD-10 code

F41.1

ICD-10 code description

Generalized anxiety disorder.

Primary outcomes**1****Description**

Anxiety

Timepoint

Before and one hour (60 minutes) after intervention the anxiety will be measured

Method of measurement

Spielberger questionnaire.

2**Description**

Blood Cortisol

Timepoint

Before and one hour after intervention the subjects' blood samples will be taken and the level of Cortisol will be measured.

Method of measurement

Using ELISA monitors Cortisol IBI kit

Secondary outcomes**1****Description**

Vital sign

Timepoint

Before and one hour after intervention.

Method of measurement

Blood pressure of the subjects will be measured before and after the intervention by a Manometer ALPK2 that was manufactured by Japan. The subjects' pulse rate and respiratory rate will be counted.

Intervention groups**1****Description**

Group intervention: The subjects inhale two drops of essential oil of Jasmine Barij Essence Kashan product for

60 minutes. Jasmine will be dropped on the patient's shirt collar shed. The surgery will be done in the morning.

Category

Placebo

2**Description**

Control group: inhale two drops of distilled water as a placebo for 60 minutes on the patient's shirt collar shed. Intervention will be held the morning of surgery.

Category

Placebo
