Comparison of aloe vera mouthwash and and Benzydamine Hydrochloride mouthwash on radiation induced mucositis in patients with head and neck cancer

Protocol summary

Summary

Study objective: The main objective of the project: Comparative evaluation of the effects of Aloe Vera and Benzydamine HCL mouth rinses on the mucositis caused by radiotherapy in patients with head and neck cancer. The secondary objectives: Effect of Aloe Vera mouth rinse on Mucositis grade, effect of Benzydamine HCL mouth rinse on Mucositis grade, comparing the effects of Aloe Vera and Benzydamine HCL mouth rinses on Mucositis grade- Design of study: randomized, triple blind, without placebo, single-Center, Phase II trial- study population: main inclusion criteria: Minimum age of 18 years, diagnosed cancer in the head and neck region, the minimum therapeutic dose of 50 Gy, oral cavity is placed in the radiation field- main exclusion criteria: history of cancer treatment during last year, history of food allergy, presence of any oral lesions including active infection, oral ulcers before starting radiation therapy- Target sample size: 26 people- study Intervention: Patients are divided into two groups by balanced block randomization. Two types of drugs are being used in this study: 1 - Aloe Vera Mouth rinse (%100) 2 - Benzydamine hydrochloride Mouth rinse(0 .15 %) (common palliative treatment of mucositis) Patients are asked to use mouthwash , three times daily, during the six weeks period of the Radiotherapy and even one week more after it. To investigate the effects of drugs on the degree of mucositis, the table provided by the World Health Organization (WHO) is used. Expected recruitment start date:10/7/2012- Expected recruitment end date: 9/1/2013- Study primary outcome: Mucositis grade

Triple blinded

Blinding description

Placebo

Not used

Assignment

Parallel

Other design features

Process of randomization: Pharmaceutical Company "Barij Essence" will be packaged the mouth rinses into two quite similar bottles and will be send them to School of Dentistry, Tehran University of Medical Sciences. Two non-beneficiaries will label the bottles and then will give them to the Researcher. Without being aware about the mouth rinses ingredients, and just based on the ordering (numbers) The researcher will give the bottles to the patients. Patients will not aware about the content of the rinses either. In the consent form it is indicated that Rinses contain Benzylamine or Aloe Vera extract. Neither the researcher, nor the patients nor the statistical analyzer will be aware of the type of mouth rinses.

Health conditions studied

1

Description of health condition studied

Mucositis

ICD-10 code

L58.0

ICD-10 code description

Acute radio dermatitis

Primary outcomes

1

Description

Mucositis grade

Timepoint

From Starting of radiation therapy, weekly during 6 weeks of treatment and 1 week after treatment

Method of measurement

questionnaire based on the Mucositis grade rating items from the World Health Organization (WHO)

Secondary outcomes

1

Description

mouth soreness

Timepoint

From starting of radiation therapy, weekly during 6 weeks of treatment and 1 week after treatment

Method of measurement

Questionnaire (Asking from patient)

2

Description

Ulcer

Timepoint

From starting of radiation therapy, weekly during 6

weeks of treatment and 1 week after treatment

Method of measurement

Questionnaire (Observation)

3

Description

Disability to swallowing solid food

Timepoint

From starting of radiation therapy, weekly during 6 weeks of treatment and 1 week after treatment

Method of measurement

Questionnaire (Asking from patient)

4

Description

Disability to alimentation

Timepoint

From starting of radiation therapy, weekly during 6 weeks of treatment and 1 week after treatment

Method of measurement

Questionnaire (Asking from patient)

5

Description

Erythema

Timepoint

From starting of radiation therapy, weekly during 6 weeks of treatment and 1 week after treatment

Method of measurement

Questionnaire (Asking from patient and observation)

Intervention groups

1

Description

Intervention: Aloe vera mouth rinse, chemical composition: Aloe vera gel 100%, concentration of 0.0009% Blue color Brilliant Blue, concentration of 0.0006% yellow color Tartrazine, manufacturer: Baryj Essence Pharmaceutical Company- During 6 weeks of Radiotherapy and up to 1 week after it, patients are asked to use 5 cc of mouth rinse 3 times a day, each time for 2 minutes and are avoid from eating and drinking for 30 minutes after using the mouth rinse.

Category

Prevention

2

Description

Control: Benzylamine hydrochloride Mouth rinse, chemical composition: Benzylamine hydrochloride 0/15 %, manufacturer: pharmaceutical company Behvazan, brand: Behvazan 0/15% - During 6 weeks of Radiotherapy and up to 1 week after it, patients are asked to use 5 cc of mouth rinse 3 times a day, each time for 2 minutes and are avoid from eating and drinking for 30 minutes after using the mouth rinse.
