Comparison of intra-articular injection of platelet rich plasma (PRP) versus combined PRP/somatropin on pain and joint range of motion in patients with knee osteoarthritis

Protocol summary

Summary

Objectives: Various methods have been proposed to treat the pain of osteoarthritis. The platelet-rich plasma (PRP) is a concentrate of autologous growth factors in the blood and due to increase in tissue regeneration is applicable in various fields of medicine. Design: Block randomization, without placebo, single center, trial phase 2, including 54 patients with knee osteoarthritis. Participants including major eligibility criteria: All patients with knee osteoarthritis. Intervention: Intervention 1. Platelet-rich plasma, 8 ml, intra-articular injection Intervention 2. Platelet-rich plasma in combination with 4 units of growth hormone, 8 ml, intra-articular injection Main outcome measures: Pain, Joint movement.

Scientific title

Comparison of intra-articular injection of platelet rich plasma (PRP) versus combined PRP/somatropin on pain and joint range of motion in patients with knee osteoarthritis

Public title

Comparison of the effect of injection of platelet-rich plasma and growth hormone into the knee joint and their effect on knee pain

Purpose

Prevention

Inclusion/Exclusion criteria

Inclusion criteria: Age between 30-70 years; Knee osteoarthritis stage I-III according to American Rheumatologist society criteria or radiologic criteria I-III according to Kalgreen-Lawrence criteria. Exclusion criteria: Addiction to opioids or alcohol; history of rheumatoid arthritis or any rheumatologic disease;

hemophilia.

Age
From **30 years** old to **70 years** old

Gender
Both

Phase
2

Groups that have been masked
No information

Sample size
Target sample size: **54**

Randomization (investigator's opinion)
Randomized

Randomization description

Blinding (investigator's opinion)
Single blinded

Blinding description

Placebo
Not used

Assignment
Parallel

Other design features
Patients were divided into two groups using block randomization.
