Evaluation of a Theory- based educational intervention to change air pollution exposure behaviors among pregnant women

Protocol summary

Summary

Objective: The aim of this study is to evaluate a Theory-based educational intervention to change air pollution preventive behaviors among pregnant women in Tehran. Design: A controlled clinical trial Setting: Prenatal care services in Tehran. Participants and eligibility criteria: 104 women with singleton pregnancy, 18-35 years old, gestational age less than 36 weeks and pregnancy without any complication will be classified into intervention and control groups, randomly. Intervention: A Transtheoretical Model (TTM)-based educational program consisted of three components: one- session motivational interviewing, a pamphlet and daily Short Message Service (SMS). The intervention will be implemented for intervention group; after one-month, follow up the data will be gathered through standard questionnaires. Main outcome variables: Constructs of TTM; the stages of change, self-efficacy and perceived benefits and barriers.
