

Clinical Trial Protocol

Iranian Registry of Clinical Trials

17 Sep 2026

The effect of the pressure bandage use in varying the pain and swelling after lower third molar surgery.

Protocol summary

Summary

(1) Objectives: Decreasing pain and swelling after wisdom tooth surgery. (2) Designs: In this study, 34 patients of Tabriz faculty of dentistry will be chosen and routine wisdom tooth surgery will be done for both of their lower wisdom teeth. (3) Setting and conduct: Case side will be chosen randomly. All surgeries will be done by the same surgeon under same circumstances. (4) Participants including major eligibility criteria: Patients with bilateral impacted lower third molars of same position will be included. Patients with systemic disease will be excluded. (5) Intervention: After the operation, Barton bandage will be used for one side. Bandage won't be used for the other side. (6) Main outcome measures (variables): Patients will be examined 48 hours after surgery. Pain would be measured one and two days after surgery. Depending on the pain severity 0 to 3 would be documented. Swelling coefficient would be measured by determining tragus- mouth corner and gonion - lateral canthus distances before and after surgery.

Name of organization / entity

Scientific title

The effect of the pressure bandage use in varying the pain and swelling after lower third molar surgery.

Public title

The effect of the pressure bandage use in varying the pain and swelling after lower third molar surgery.

Purpose

Prevention

Inclusion/Exclusion criteria

Major Inclusion criteria: Having bilateral impacted third molars; Having impacted third molars in the same position. Major Exclusion criteria: Systemic diseases; bone diseases

Age

From **18 years** old to **35 years** old

Gender

Both

Phase

2-3

Groups that have been masked

No information

Sample size

Target sample size: 34

Health conditions studied

1

Description of health condition studied

Swelling

ICD-10 code

R60

ICD-10 code description

Oedema, not elsewhere classified

2

Description of health condition studied

Pain

ICD-10 code

R52.9

ICD-10 code description

Pain, unspecified

Primary outcomes

1

Description

Swelling

Timepoint

Before and 48 hours after surgery

Method of measurement

Millimeters by meterstick

Secondary outcomes

1

Description

Pain

Timepoint

24 and 48 hours after surgery

Method of measurement

Questionnaire

Intervention groups

1

Description

Intervention: Using Barton bandage that is a kind of pressure bandage during 24 hours after surgery of one side impacted wisdom tooth.

Category

Prevention

2

Description

Control: Not using Barton bandage after surgery of the other side impacted wisdom tooth.
