Comparison of the effect of echinacea and chlorhexidine mouthwashes on oral health of intubated patients in the Intensive Care Unit

Protocol summary

Summary

The aims of this study is comparison the effect of Echinacea and chlorhexidine mouthwash on microbial flora of oral cavity. In this study 70 intubated patients who admitted in ICU ward of Vali Asr Hospital, will be randomly divided into two groups. Technique, timing and frequency of mouthwash application is similar in both groups. patients with age of 18-65 years old who were admitted in ICU Less than 12 hours will eligible to the study. Transferring from ICU or death before the completion of intervention; allergy to herbal medications; history or current chronic or immune system diseases are exclusion criteria. culture of oral specimens will taken at 0, 4 days after intervention. oral hygiene check lists including BOAS and MPS will be completed at 0 and 4 days after intervention too.
