Comparison of the effect of transdiagnostic group therapy with cognitive group therapy in deduction of university students symptoms of adjustment disorder and promoting their happiness and quality of life with primary diagnosis of adjustment disorder

Protocol summary

Summary

The purpose of this study is comparison of the effect of transdiagnostic group therapy with cognitive group therapy in deduction of university students' symptoms of adjustment disorder, depression and anxiety and promoting their happiness and quality of life with primary diagnosis of adjustment disorder. Global plan of this study is pre-test post-test with control group (cognitive group therapy as a standard treatment). The population is university students with adjustment disorder and the sample of it, is 30 university students with this kind of diagnosis (15 people in experimental group or transdiagnostic group and 15 people in control group or cognitive group). Inclusion criterion: having adjustment disorder diagnosis with depressed mood and anxiety symptoms (scores in depression and anxiety should be more than the cut of the inventories). Exclusion criteria: other diagnosis of axis I such as grief, MDD, psychosis, PTSD; drug abuse; giving another psychological treatment or using psychiatric drugs and physical defects. Transdiagnostic group therapy should be 9 sessions (each session is 2 hours in a week) and cognitive group therapy should be 10 sessions (each session is 2 hours in a week). The expected conclusion is deduction of adjustment symptoms and promoting of life quality and happiness.

Health conditions studied

1

Description of health condition studied
Adjustment disorders
ICD-10 code
F43.2
ICD-10 code description
Adjustment disorders

Primary outcomes

1

Description
Adjustment disorder symptoms
Timepoint
Before intervention and after intervention
Method of measurement
Structured clinical interview for DSM-IV

2

Description
Depression
Timepoint
Before intervention and after intervention
Method of measurement
Beck depression inventory

3

Description
Anxiety
Timepoint
Before intervention and after intervention
Method of measurement
Beck anxiety inventory

4

Description
General function
Timepoint
Before intervention and after intervention
Method of measurement
Work and social adjustment scale

5

Description
Happiness
Timepoint
Before intervention and after intervention
Method of measurement
Oxford happiness interview

6

Description
Quality of life
Timepoint

Before intervention and after intervention
