Health conditions studied

1

Description of health condition studied

Comparison of Pap smear quality in two methods

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description

adequacy of cell

Timepoint

1 mounts after intervention

Method of measurement

result of the papsmear

Secondary outcomes

1

Description

sub clinical infection

Timepoint

1 mount after intervention

Method of measurement

result of the papsmear

Intervention groups

1

Description

All patients who have enclosion criteria undergo pop
smear and in first time with one of cervix brush or
cytobrush_spatula then samples send to laboratory and
blindly describe them with BETHESDA

Category

Diagnosis

2

Description

30 days after first examination the test repeated with the
other device and samples send to laboratory for
description.
