

Clinical Trial Protocol

Iranian Registry of Clinical Trials

16 Sep 2026

Effect of pentoxifyllin and its compration with placebo as an adjunctive drug in diabetic foot ulcer in diabetic patients.

Protocol summary

Summary

This study is double blind. Placebo control and done in razi hospital of Ahwaz. Target of study is effect of pentoxifyllin as an adjunctive drug in antibiotic treatment of diabetic foot infection. The patients with diabetic foot ulcer, grade 2 and 3 wagner come to the study and those patients with upper GI upset, Sensitivity of pentoxifylline 3-Sensitivity to methylxanthines and Limb vascular occlusion more than 80 percent were excluded from the study. All of the patients are eighty divided into two groups randomly. In interventional group tab Pentoxifylline 400mg are administered every eight hours for 6 Month. In placebo group, placebo drugs are administered every eight hours for 6 Month. Then the patients are visited weekly in first month then monthly for 6 month. In each visit we evaluated the patients for: clinical status, ankle/brachial index, decrease of ulcer size and need to ulcer debridement, foot amputation, change or discontinuation of antibiotics. Finally, we analyse and compare the placebo and drug groups data.

Primary outcomes

1

Description

Healing of diabetic foot ulcers

Timepoint

weekly in first month then every month up to six months

Method of measurement

CM and MM

Secondary outcomes

1

Description

ankle/brachial index improvement

Timepoint

weekly in first month then every month up to six months

Method of measurement

with sphingomanometry and with mmHg unit

2

Description

Amputation need

Timepoint

weekly in first month then every month up to six months

Method of measurement

with physical exam , need or dont need

3

Description

debridmeant need

Timepoint

weekly in first month then every month up to six months

Method of measurement

with physical exam, need or dont need

Intervention groups

1

Description

for intervention group; tab Pentoxifylline 400mg every eight hours for 6 Month.

Category

Treatment - Drugs

2

Description

for control group;placebo every eight hours for six month.

Category

Treatment - Drugs
