Effectiveness of communication skills training on the development of emotional maturity of Female students in marriage

Protocol summary

Summary

The purpose of this study was to evaluate the effectiveness of communication skills training on the development of emotional maturity female students in marriage. The study included all female students in marriage (and candidate's marriage) of Abarkouh city in the academic year 2010-2011. The sample in this study is randomly selected and thus emotional maturity test were carried among 26-21 year old female students in marriage of Abarkouh universities, among those were obtained in the test scores between 106-89 (indicates no Being emotionally stable), 30 patients were selected randomly and were replaced in both experimental and control groups. The experimental group attended in 10 sections 90 minute on communication skills training program. After the education, after 1 month, of all control and experimental groups, test was performed. In this research, consequence under-study was emotional maturity that was measured by a questionnaire of emotional maturity. Considering the importance of communication skills and emotional maturity for young people, executing educational courses for youth to knowledge how better communicate with others, especially before marriage can be useful.
