The impact of reproductive health services in disaster training workshop on professional competence of midwives Red Crescent volunteers

Protocol summary

Summary

This study aimed to investigate the impact of reproductive health in disaster workshops to raise professional promotion and advancement of midwifery who are the members of basic health care teams. Both control and intervention groups have been randomly selected. The selected number of 64 intervention group will be taken part in 2 workshops from 21 provinces in yazd and golestan. These workshops would take 3 days. 64 people as control group would be selected from mentioned provinces. The target groups are volunteers of IRCS. The control group wont be trained at all. The training in the workshops would be done on the base of reproductive health in disaster standards. The impact of training on the knowledge, attitude and skill of participants would be done through a questionnaire before and 2 months after intervention. The control team involving 64 people. This group would be selected among untrained midwives randomly from 21 mentioned provinces. They will complete this questionnaire too. This group wont be trained. The control group will fill the questionnaire form at the same time. Entry requirements and necessary qualification: Having degree in midwifery; Taking part in reproductive health in disaster workshop; Being member in rapid response teams of IRCS. Exclusion criteria and necessary qualification: Not to participation on full days of workshop.
