The comparison of the effect of surgical treatment of midshaft clavicle fracture with plate versus non operative treatment in imam Golestan and Razi hospital during 1390-1392

Protocol summary

Summary

The aim of this study is comparison of the effect of surgical treatment of midshaft clavicle fracture with plate versus non surgical treatment. In this study, 70 patients with fractures of the medial clavicle referred to the emergency ward of Razi and Emam hospitals, are enrolled into the study and after a thorough explanation about the complications of treatment are randomly assigned to 2 groups. The patients in two groups are matched for age, sex, and fracture type. Clinical and radiological evaluation and follow up will be done for 3 months until a full-time union. At the end of treatment DASH score questionnaire will be completed and the results of examinations and questionnaires in two groups will be compared.

Scientific title

The comparison of the effect of surgical treatment of midshaft clavicle fracture with plate versus non operative treatment in imam Golestan and Razi hospital during 1390-1392

Public title

The comparison of the results of surgical and non surgical treatment of clavicle fracture

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria: fractured clavicle midshaft, age under 60 years old over 18 years Exclusion criteria: clavicular fractures elsewhere; ages under 18 years of age to 80 years.

Age

From **18 years** old to **60 years** old

Gender

Both

Phase
N/A

Groups that have been masked
No information

Sample size
Target sample size: **70**

Randomization (investigator's opinion)

Health conditions studied

1

Description of health condition studied
Fracture of clavicle

ICD-10 code
S42.0

ICD-10 code description
Fracture of clavicle

Primary outcomes

1

Description
Union of clavicle fracture

Timepoint
Every 6 month

Method of measurement

Serial x Ray

2

Description
Physical function

Timepoint
Every 6 month

Method of measurement
Physical exam and DASH score

3

Description
Time to go back to work

Timepoint
Every 6 month

Method of measurement
Based on day

4

Description
Cost of treatment

Timepoint
Every 6 month

Method of measurement
Spending on Rials

5

Description
Restriction movement

Timepoint
Every 6 month

Method of measurement
Physical examination and calculation of shoulder joint
range of motion

6

Description
Treatment duration

Timepoint
Every 6 month

Method of measurement
Full recovery by day

7

Description
Pain

Timepoint
Every 6 month

Method of measurement
History an functional score

Secondary outcomes

1

Description

Malunion of clavicle fracture
Timepoint
Every 6 month
Method of measurement
Serial x Ray

Intervention groups

1

Description
Clavicle fracture surgery
Category
Treatment - Surgery

2

Description
Non operative treatment of clavicle fracture
Category
Treatment - Other
