The effect of Newborn massage on paternal-Newborn attachment - Randomized control Trial

Protocol summary

Summary

The present study evaluated the effect of infant massage with father on father- infant attachment. 100 infant that due to Jaundice were admitted and have Inclusion criteria such as: were full term, birth weight above 2500 gr and no sever illness – enter study and randomized control and intervention group. Because of sample loss, Control group with 48 infant and Intervention group with 37 infant analyzed. All of fathers at once after admitted, fill demographic Questionnaire and father- infant attachment Questionnaire (John Condon 2008). In intervention group, fathers during 3 days research massaged their infant daily but control group fathers visited their infant according to hospital routine. After 4 days the fathers of groups, fill father-infant attachment Questionnaire again. Finally the data of Questionnaire analyzed.

Description

attachment

Timepoint

before Intervention- 3 days post Intervention

Method of measurement

Paternal- infant attachment Questionnaire John Condon2008

Secondary outcomes

empty

Intervention groups

1

Description

In intervention group fathers during 3-day study massage their infant once daily. The father warms his hand and places the infant on the desk and applies olive oil and starts massaging the infant from the leg and continues to the arm, chest, head and back during 8 phases that last approximately 12 minutes. 1) Begin with baby's feet. Using your thumb and index finger, stroke from toe to heel along the sole of the foot and toe to ankle on the top of the foot. 2) Now, hold baby's leg gently at the ankle with one hand and using a slow, gentle circular motion, stroke from baby's ankle to hip with alternating hands. 3) Move to baby's hands. Open baby's hand with your thumb and gently stroke the palm and top of the hand. Gently roll each of baby's fingers between your index finger and thumb. 4) Hold baby's wrist with one hand and stroke from the wrist to the shoulder. Then, massage around each shoulder with gentle, small, circular motions. 5) Using a circular motion and light touch, stroke baby's tummy in a clockwise direction below the rib cage. Avoid baby's navel if the cord is still attached. 6) Then, place both hands on the center of baby's chest. Gently stroke out to the sides, bring your hands down and then back up to the center of the baby's chest. 7) Cradle baby's head with your hands. Using both thumbs, gently stroke baby's head in a circular motion, moving around the crown and ears. Avoid baby's soft spots. 8) Place baby on tummy. Start with both hands together on baby's back. Slowly stroke baby from the shoulders to the buttocks and back to the shoulders.
