Health conditions studied

1

Description of health condition studied

Drug addiction

ICD-10 code

F11

ICD-10 code description

Mental and behavioural disorders due to use of opioids

Primary outcomes

1

Description

Readiness for addiction treatment (Subjective behavior)

Timepoint

Before intervention and two months after intervention

Method of measurement

The Stages of Change Readiness and Treatment
Eagerness Scale

2

Description

Regular referral to the addiction center (Objective
behavior)

Timepoint

Before intervention and two months after intervention

Method of measurement

Questionnaire

3

Description

Situation of using of stress management methods
(Objective behavior)

Timepoint

Before intervention and two months after intervention

Method of measurement

Questionnaire

4

Description

Perceived Stress

Timepoint

Before intervention and two months after intervention

Method of measurement

Perceived Stress Scale

Secondary outcomes

1

Description

perceived susceptibility

Timepoint

Before the intervention and two months after

intervention
Method of measurement
questionnaire

2

Description

perceived benefits

Timepoint

before the intervention and two months after intervention

Method of measurement

questionnaire

3

Description

perceived barriers

Timepoint

before the intervention and two months after intervention

Method of measurement

questionnaire

4

Description

perceived severity

Timepoint

before intervention and two months after intervention

Method of measurement

questionnaire

5

Description

self-efficacy

Timepoint

before intervention and two months after intervention

Method of measurement

questionnaire

6

Description

Cues to action

Timepoint

before intervention and two months after intervention

Method of measurement

questionnaire

Intervention groups

1

Description

After the pre-test in both groups of addicts, participating addicts in the intervention group will be invited to participate in four educational sessions (during three weeks). Educational program will be hold based on health belief model, group discussions and educational video. Two months after end of the program, from each group will be taken post-test and the results will be

compared.
