copmarsion of treatment effects with and without the use of Fluconazole on acute biliary pancreatitis

Protocol summary

Summary

The aim of this study is to evaluate the therapeutic effect of fluconazole on acute biliary pancreatitis. The desired number of samples, 76 patients with acute biliary pancreatitis admitted to Imam Reza Hospital are selected and they are divided into two groups through Table of random numbers. In one group the routine treatment is performed (included Restriction of oral intake, correction of water and electrolyte, pain management, intravenous fluids and monitoring of central venous pressure, urine output controls the prescription of prophylactic antibiotics) and in other group, Fluconazole is added to the treatment regimen. Agreement form is completed for all patients and Patients are not aware of being in the fluconazole group or standard treatment. Inclusion criteria: consists of those who have been diagnosed with acute biliary pancreatitis based on clinical; laboratory and ultrasound results. criteria excluded: Pregnant women; patients with a history of previous hypersensitivity to fluconazole to mention; person that any allergies or suffer from the study. The severity of disease in patients is determined based on Ransom criteria on admission or CT Scan. Mild cases are cared in general ward and severe cases are hospitalized or admitted in the intensive care unit. Ransom criteria and serum amylase levels will be recalculated at 48 h after admission. Patients in both groups are evaluated in terms of complications, requiring to necrosectomy surgery, hospital stay duration, staying in the intensive care unit and cost of hospitalization.

Health conditions studied

1

Description of health condition studied

biliary acute pancreatitis

ICD-10 code

k85.1

ICD-10 code description

biliary acute pancreatitis

Primary outcomes

1

Description

Severity of disease

Timepoint

at starting point and six months later

Method of measurement

Based on Ratson criteria and CT. Scan

2

Description

necessity to operation

Timepoint

at starting point and 6 months later

Method of measurement

based on patient records

3

Description

duration of staying in hospita

Timepoint

at starting point and 6 months later

Method of measurement

based on patient records

4

Description

duration of staying in hospital

Timepoint

at starting point and 6 months later

Method of measurement

based on patient records

5

Description

costs of disease

Timepoint

at starting point and 6 months later

Method of measurement

based on patient records

6

Description

treatments

Timepoint

at starting point and 6 months later

Method of measurement

based on patient records

7

Description

complications

Timepoint

at starting point and 6 months later

Method of measurement

based on patient records

8

Description

mortality rate

Timepoint

at starting point and 6 months later

Method of measurement

based on patient records

Secondary outcomes
