Treatment of cerebral venouse sinus thrombosis

Protocol summary

Summary

Cerebral venous thrombosis is a disorder that can affect all age groups. In this study; we are going to compare the efficacy of low molecular weight heparin (1mg/kg twice a daily) versus unfractionated heparin (25000-65000 u/day) in cerebral venous thrombosis (CVT) treatment. In this clinical trial 36 patients with CVT diagnosed who referred to neurology clinic of Emam Reza hospital of kermanshah, will be randomly allocated into one of the two mentioned groups. In all patients, measure of global disability according to modified Rankin scale and NIH stroke scale will be assessed before of the treatment, discharge time, and one month later. Finally, measure of global disability, amount of admission times and mortality rate in each group will be compared.

Scientific title

Treatment of cerebral venouse sinus thrombosis

Public title

Comparison of low molecular weight heparin and unfractionated heparin in cerebral venouse thrombosis treatment

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criterion: the patients with cerebral venouse thrombosis diagnosed on the basis of MR venography.

Exclusion criteria: age of <18 years old; contraindications for anticoagulant; bleeding disorder; hepatic or renal dysfunction; uncontrolled hypertension; thrombocytopenia; gastrointestinal hemorrhage; papilledema with impaired vision that required lumbar punctures.

Age

No age limit

Gender

Both

Phase

2

Groups that have been masked

Health conditions studied

1

Description of health condition studied

cerebral venouse sinus thrombosis

ICD-10 code

G46.8

ICD-10 code description

Other vascular syndromes of brain in cerebrovascular diseases

Primary outcomes

1

Description

measure of global disability

Timepoint

before of the trearment,discharge time,one month after discharge

Method of measurement

according to modified Rankin scale

Secondary outcomes

1

Description

focal neurologic deficit

Timepoint

before of treatment,discharge time,one month after discharge

Method of measurement

NIH Stroke scale

Intervention groups

1

Description

low molecular weight heparin 1mg/kg S/C twice a day for 7days.

Category

Treatment - Drugs

2

Description

unfractionated heparin 25000-65000 u IV daily for 7days.

Category

Treatment - Drugs
