### Comparing effect of Chlorhexidine and Persica mouthwashes on color of tooth, gingival bleeding and pain after Scaling in patients suffering gingivitis

#### Protocol summary

##### Summary

The aim of this study is comparing effects of Persica and Chlorhexidine mouthwashes on color of tooth, gingival bleeding and pain after Scaling. This study is Randomized clinical trial and double blind, controlled by placebo and phases two and three of trial. Having 2 quadrant or more with CPITN more than one and less than three is major Inclusion criteria and Having systemic conditions or diseases is major exclusion criteria. In this clinical trial, 48 patients suffering from gingivitis, referring to department of periodontics of Yazd Dental School are evaluated randomly in 3 groups (16 patient in each group). Before any interventions, gingival bleeding index and color of tooth index are evaluated. Then, Normal Saline (placebo) is given to the first group, Chlorhexidine is given to the second group and Persica is given to the third group. Then, gingival bleeding Index and color of tooth index are evaluated after prescription of mouthwashes and placebo for the second time. In the next stage, After scaling, pain index is evaluated for the first time. Then, mouthwashes and placebo are prescribed for one week. Finally three indexes are evaluated after a week. Primary outcomes of this study are gingival bleeding and pain after scaling.

#### General information

##### Acronym

##### IRCT registration information

IRCT registration number: **IRCT2014012816407N1**

Registration date: **2014-07-10, 1393/04/19**

Registration timing: **retrospective**

Last update:

Update count: **0**

##### Registration date

2014-07-10, 1393/04/19

#### Registrant information

##### Name

Motahare Baghestani

##### Name of organization / entity

Dental school ,Shahid Sadoughi university of science, Yazd, Iran

##### Country

Iran (Islamic Republic of)

#### Actual recruitment end date

empty

#### Trial completion date

empty

#### Scientific title

Comparing effect of Chlorhexidine and Persica mouthwashes on color of tooth, gingival bleeding and pain after Scaling in patients suffering gingivitis

#### Public title

Effect of Persica mouthwash on the color of tooth, gingival bleeding and pain after scaling

#### Purpose

Prevention

#### Inclusion/Exclusion criteria

Inclusion: Having 2 quadrant or more with CPITN more than one and less than three; being healthy systematically  
Exclusion: Having systemic conditions or diseases; pregnancy; smoking; puberty

#### Age

From **10 years** old

#### Gender

Both

#### Phase

2-3

#### Groups that have been masked

*No information*

#### Sample size

Target sample size: **48**

#### Randomization (investigator's opinion)

Randomized

#### Randomization description

#### Blinding (investigator's opinion)

Double blinded

#### Blinding description

#### Placebo

Used

#### Assignment

Parallel

## Secondary Ids

empty

## Ethics committees

### 1

#### Ethics committee

##### Name of ethics committee

Yazd Shahid Sadoughi University of Medical Sciences

##### Street address

Shahid Bahonar square, Yazd, Islamic Republic of Iran

##### City

Yazd

##### Postal code

#### Approval date

2013-07-13, 1392/04/22

#### Ethics committee reference number

17.1.71408پ

## Health conditions studied

### 1

#### Description of health condition studied

Gingivitis

#### ICD-10 code

K05.1

#### ICD-10 code description

Chronic gingivitis

## Primary outcomes

### 1

#### Description

Gingival bleeding

#### Timepoint

Before intervention, after using mouthwashes, one week after using mouthwash

#### Method of measurement

By bleeding on probing (BOP): not bleeding number zero, bleeding less than a dot number one, bleeding more than a dot number two

### 2

#### Description

Pain

#### Timepoint

After scaling, one week after using mouthwashes

#### Method of measurement

Visual Pain Scale

## Secondary outcomes

### 1

#### Description

Color of tooth

#### Timepoint

before intervention, after using mouthwashes, one week after using mouthwashes

#### Method of measurement

Having or do not having color changing (number and percent of teeth with color changing)

## Intervention groups

### 1

#### Description

Normal Saline (placebo) is given to the patients of the first group and they are requested to use it 3 times a day, each time 30 seconds for a week (each time 15 mili litre). They are requested to do not eat any things and do not wash their mouth until one hour after using it.

#### Category

Placebo

### 2

#### Description

Chlorhexidine is given to the patients of the second group and they are requested to use it 3 times a day, each time 30 seconds for a week(each time 15 mili litre). They are requested to do not eat any things and do not wash their mouth until one hour after using it.

#### Category

Prevention

### 3

#### Description

Persica is given to the patients of the third group and they are requested to use it 3 times a day, each time 30

seconds (each time, 15 drops of Persica are fallen in 2 spoons of water) for a week. They are requested to do not eat any things and do not wash their mouth until one hour after using it.
