The effects of two selected types of training on primary dysmenorrhea in adolescent girls

Protocol summary

Summary

The purpose of this study was to compare the effects of aerobic training and pelvic floor muscle exercises on primary dysmenorrhea in Saleh Abad city adolescent girls. In this study which was conducted semi empirical, 45 subjects that suffering from average and severe primary dysmenorrhea participated as the research sample. The subjects were selected voluntarily and were divided in a simple random method into three groups of 15 as aerobic training, kegel training and control groups. The exercise protocol were conducted three sessions a week with intensity of 65 percent of maximum heart rate during 45-minute; and in pelvic floor muscle group it was done daily three sessions for 15 minutes. The two groups had performed the exercises for eight weeks. The control group had no exercise activity during this period. Primary dysmenorrhea measurement questionnaires was used to collect the data(intensity and duration of pain) and in order to homogenize the aerobic fitness of the subjects, a test includes running a mile was used pre and post eight weeks.

Health conditions studied

1

Description of health condition studied

primary dysmenorrhea

ICD-10 code

N94.4

ICD-10 code description

Noninflammatory disorders of female genital tract

Primary outcomes

1

Description

Intensity of pain

Timepoint

pre and post 8 weeks exercise

Method of measurement

pain ruler(vas)

Secondary outcomes

1

Description

Duration of pain

Timepoint

pre and post 8 weeks exercise

Method of measurement

Questionnaire

Intervention groups

1

Description

aerobic exercise was in first group . The exercise protocol was conducted three sessions a week with intensity of 65 percent of maximum heart rate during 45 minute for 8 week

Category

N/A

2

Description

pelvic floor muscle exercise was in second group.in pelvic floor muscle group it was done three sessions daily for 15 minutes performed the exercises for eight weeks

Category

N/A

3

Description

have not exercise for control group
