Evaluation of Medication Overuse Headache and Compression Between the Effect of Prednisolone - nortriptylin and prednisolone- sodium valproate

Protocol summary

Summary

Prednisolone-Sodium Valproate has not been extensively abused by the patients as a pain reliever medication in treating headaches. The aim of study is analyzing the efficacy of Prednisolone-Sodium Valproate and comparing it with Prednisolone-Nortriptyline in reduction of headache severity during the withdrawal period of the medicine. The study uses a randomized, double-blind clinical trial methodology on patients of a private clinic in Babol during in 2016 between 15 to 60 year old patients, who are suffering from headache more than 15 days in month, are enrolled in the trial. Subjects are divided into two random groups. Both groups are prescribed with Prednisolone 50mg/1kg for 5 days. Additionally, a random group receive Sodium Valproate 200mg every 12 hours, and the other group is given Nortriptyline 10mg every 24 hours, for two months. The factors such as days of headache, headache severity, duration of headache, taking other pain relievers due to severe pain, and drugs side effects are investigated. Visual analog scale (VAS) is used to determine the severity of headaches.

Scientific title

Evaluation of Medication Overuse Headache and Compression Between the Effect of Prednisolone - nortriptylin and prednisolone- sodium valproate

Public title

Treatment of stage withdrawal headaches caused by abuse drugs.

Purpose

Prevention

Inclusion/Exclusion criteria

Inclusion criteria: age between 15-60 years; daily headache present on 15day/month; regular overuse for >3 month of 1 or more acute/symptomatic treatment

drugs; headache has developed during medication overuse. Exclusion criteria: Age<15 years, severe systemic pathologic associated to chronic headache; major psychiatric disorder such as major depression; hypochondriasis; Contraindication or sensitivity to drugs use in study; pregnancy or lactation

Age

From **15 years** old to **60 years** old

Gender

Both

Phase

N/A

Groups that have been masked

No information

Sample size

Target sample size: **50**

Health conditions studied

1

Description of health condition studied

Headache caused by drug abuse

ICD-10 code

G44.4

ICD-10 code description

Drug-induced headache

Primary outcomes

1

Description

Number of headache attack s

Timepoint

Before treatment, after 2 month of treatment

Method of measurement

number

2

Description

Remission headache

Timepoint

Before treatment, after 2 month of treatment

Method of measurement

Qualitative and based on the positive or negative.

3

Description

The days of headache

Timepoint

Before treatment, after 2 month of treatment

Method of measurement

day

Secondary outcomes

1

Description

Drug side effect

Timepoint

At the start of the intervention, after 2 month of treatment

Method of measurement

questionnaire

Intervention groups

1

Description

Prednisolone 50mg/1kg for 5 days. Additionally, a random group will receive Nortriptyline 10mg every 24 hours

Category

Treatment - Drugs

2

Description

Prednisolone 50mg/1kg for 5 days. Additionally, a random group will receive Sodium Valproate 200mg every 12 hours for 2 month

Category

Treatment - Drugs
