Effects of Lactobacillus acidophilus probiotic as an adjuvant therapy with the standard treatments on the immune system and treatment efficacy in patients with locally advanced rectal cancer: Phase III randomized clinical trial

Protocol summary

Summary

Current study is aimed to investigate the effects Lactobacillus acidophilus as an adjuvant therapy with standard treatments, by improving the immune system function in patients with rectal cancer. 150 patients who will refer to Firoozgar and Imam Khomeini Hospital randomly from summer 95 to March 96. The patients will be block randomization divided into two 75-patient groups. The case group will receive Lactobacillus acidophilus capsule (1.5 g/daily, produced by Zist Takhmir Co), and the control group will receive the placebo capsules from one day before chemo-radiation to one week before surgery for 13 weeks. At the beginning and the end of study, answering to the questionnaire and related forms (CRF, FFQ), height and weight measurement and blood sampling will be performed by an expert person. Furthermore, at the end of 13th week, CT Imaging will be done on the patient for reinvestigation of tumor size under the clinical diagnosis. The tests carried out on serum samples include ELISA technique for evaluating the serum levels of cytokines, Real-time PCR for measuring the expression of STAT4 gene, and Flowcytometry for CD_s measurement.

Scientific title

Effects of Lactobacillus acidophilus probiotic as an adjuvant therapy with the standard treatments on the immune system and treatment efficacy in patients with locally advanced rectal cancer: Phase III randomized clinical trial

Public title

The effects of Lactobacillus acidophilus probiotic capsule administration on the immune system and treatment efficacy in patients with rectal cancer

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria : Patient with locally advanced rectal cancer ; Patient with non-metastatic rectal cancer; Voluntary participation in the study and informed consent form fulfilling; Lack of swallowing disorder.

Exclusion criteria : Patients with other cancers; Patients with renal and hepatic disorders; Patients with intestinal obstruction; Patients with low level of white blood cells (less than 1000 cells per mm³); Patients with drug intolerance or drug sensitivity to probiotics.

Age

No age limit

Gender

Both
