Evaluation of prophylactic salpingectomy on ovarian function in patients undergo hysterectomy by laparoscopic & laparotomy in Arash hospital

Protocol summary

Tehran University of Medical Sciences

Summary

This clinical trial will be performed on hysterectomy candidates admitted to Arash hospital, Tehran, Iran in 2014. After assessing inclusion and exclusion criteria, 40 patients will be included in the study. Patients randomly will be divided into two groups. First group will undergo hysterectomy and salpingectomy. The second group will undergo only hysterectomy. Before intervention and 3 months after it, FSH and anti mullerian hormone levels will be assessed.
