

Clinical Trial Protocol

Iranian Registry of Clinical Trials

10 Jun 2026

The effect of Samen-ista emulsion on treatment of bleeding from benign ulcers of upper gastrointestinal tract in comparison with Argon plasma coagulation method.

Protocol summary

Summary

We will do our study on 40 conscious and stable patients whom will be admitted in Ghaem and Imamreza hospitals of Mashhad due to upper gastrointestinal bleeding from an ulcer with benign endoscopic view. After completing consent form and considering of exclusion criteria, they will be randomized according to the table of numbers into two groups. The first group will be treated with 20cc from 20% Samen-ista emulsion, which is a mineralo-herbal emulsion with anticoagulant property in animal models. This emulsion will be poured on the bleeding ulcer from 2mm distance, via an ERCP-catheter. The patient will be under observation for 5 minutes during the endoscopy to evaluate stop bleeding, if any bleeding was seen after 5 minutes, treatment with Argon plasma coagulation will be done. In the second group the gastrointestinal bleeding will be treated with Argon plasma coagulation method. The rate of success in bleeding control at 5min after treatment during first endoscopy and also in the second endoscopy which will be done 72 hours later will be compared between the two groups.

Scientific title

The effect of Samen-ista emulsion on treatment of bleeding from benign ulcers of upper gastrointestinal tract in comparison with Argon plasma coagulation method.

Public title

The effect of Samen-ista emulsion on treatment of bleeding from benign ulcers of upper gastrointestinal tract.

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria: The patients with Upper gastrointestinal bleeding who will be admitted in emergency wards of Ghaem and Imam-reza Hospitals. Exclusion criteria: Bleeding from esophageal or gastric varices; Bleeding from esophageal or gastric malignancy; Bleeding in a patient with coagulopathy, hematologic malignancy or renal failure.

Age

From **18 years** old to **70 years** old

Gender

Both

Phase

3

Groups that have been masked
