Health conditions studied

1

Description of health condition studied
PRETERM LABOUR

ICD-10 code
O60.0

ICD-10 code description
Preterm labour without delivery

Primary outcomes

1

Description
preterm labour before of 37 weeks

Timepoint
At the onset of intervention to preterm labor or to complete 37 weeks of pregnancy

Method of measurement
Patient visits, uterine contraction determination

Secondary outcomes

empty

Intervention groups

1

Description
Intervention group: intramuscular dose of 250 mg 17 - alpha-hydroxyprogesterone caproate is administered once a week until the occurrence of preterm birth or complete of 34 weeks of pregnancy

Category
Treatment - Drugs

2

Description
Control group: intramuscular dose of 250 mg placebo injection is administered once a week until the occurrence of preterm birth or complete of 34 weeks of pregnancy

Category
Treatment - Drugs
