The effect of zinc sulfate on prevention of diarrhea due to coamoxiclave in pediatric 6-60 MO

Protocol summary

Summary

The purpose of this study is to investigate the effect of zinc sulfate supplementation on prevention of diarrhea due to coamoxiclave. This study is randomized clinical trial. A Total of 120 children suffering from otitis media that have indication of using coamoxiclave were enrolled. Exclusion criteria is severe malnutrition; using antibiotic in 2 recent week; chronic illness; systemic disease that need to hospitalized; severe dehydration; flude intoleranc; using immunosuppressive drug; using drugs causing diarrhea or constipation; using zinc supplement in two recent month; Parent who do not cooperate. After interview and accept parent satisfaction. their children were enrolled in this study. We will prescribe zinc sulfate 2mg/kg/day and also coamoxiclave 80mg/kg/day for intervention group but controll group only recieve coamoxiclave at the same dosage. Using drugs continue for seven days in this study. The researcher investigate patient condition about the number of defication on third and seventh days. Then we will collect data in questionnaire . Primary outcome is to consider number of defication and the secondry outcomes are weight loss and hospitalization

Health conditions studied

1

Description of health condition studied

Non infective enteritis and colitis

ICD-10 code

k52

ICD-10 code description

Other noninfective gastroenteritis and colitis

Primary outcomes

1

Description

Number of defecation in day

Timepoint

Third and seventh day of treatment

Method of measurement

Asking from mothers of patients

Secondary outcomes

1

Description

Hospitalization

Timepoint

First day until seventh day of treatment

Method of measurement

Asking from mothers of patient

2

Description

Weight loss

Timepoint

Seventh day of treatment

Method of measurement

Weighting patient by resident

Intervention groups

1

Description

Intervention group: Zinc sulfate syrup (manufacture by Alhavi Co, Iran) 2mg/kg/day divided in two equal dosage and coamoxiclave syrup (manufacture by Abidi Co, Iran) 80mg/kg/day divided in tree equal dosage will prescribe whitin seven days

Category

Prevention
