Efficacy assessment of adipose drive stem cell in nasolabial fold wrinkles

Protocol summary

Summary

Efficacy assessment of adipose driven stem cells in nasolabial fold wrinkle is the aim of this study. Firstly biometric parameters of patient face before intervention would be measured and then about 100cc of abdominal fat would be taken via liposuction technique being suspended and finally the suspension of adipose derived stem cells as in Stromal Vascular Fractioned(SVF) would be injected in patient nasolabial fold. After 1,3,6 month from injection, biometric parameters will be assessed for second time to estimate healing rate. Inclusion criteria are as to have 35 to 55 years old, no systemic disease, have nasolabial wrinkle type 2,3,4. Exclusion criteria are to have many or huge wrinkles and to be under any intervention in face before as gel injection and etc. Study Population group is from people referring to skin and stem cell research center and sample size is 16 person. our intervention is injection of adipose derived stem cells in nasolabial fold and to compare wrinkle rate after intervention.

Scientific title

Efficacy assessment of adipose drive stem cell in nasolabial fold wrinkles

Public title

Efficacy assessment of cell therapy in skin aging

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria: age about 35 to 55 years old; Having no anatomic disorder in face; Wrinkle type between grade 2 to 4; Normal mental health; Having a good cooperation with research team; Exclusion criteria: being smokers or drinkers; any past skin intervention in face; Having many wrinkles on the face; type of 1 or 5 of wrinkle scoring; having a mental disorder; having an obsessed disorder; having any skin disorder; having any major disorder; having a systemic disorder; having an oral disorder;

Age

From **35 years** old to **55 years** old

Gender

Both

Phase

3

Groups that have been masked

Health conditions studied

1

Description of health condition studied

atrophic disorders of skin (aging)

ICD-10 code

L90.9

ICD-10 code description

Atrophic disorder of skin, unspecified

Primary outcomes

1

Description

Quantity of nasolabial fold wrinkle - Extension

Timepoint

1- 3 - 6 Month after cell therapy

Method of measurement

Biometry with visioface & skin sonography

2

Description

Quality of nasolabial fold wrinkle - deep

Timepoint

1 - 3 - 6 Mounth after intervention

Method of measurement

Visio face & skin sono

Secondary outcomes

1

Description

Color

Timepoint

1 - 3 - 6 Month after cell therapy

Method of measurement

Biometry with colorimeter

2

Description

Elastisity

Timepoint

1 - 3 - 6 Eounth after intervention

Method of measurement

MPA 9

Intervention groups

1

Description

2cc suspension of adipose drive stem cell (SVF) that made from 100 cc abdominal adipose will injected in nasolabial fold and the end, healing rate of nasolabial fold wrinkle will measured.
