The effect of nettle(Netonal Barij) on sleep quality in hemodialysis patients

Protocol summary

Summary

This study was an interventional study in a randomized, controlled clinical trial with the aim of effecting nettle (Neonatal Pill) on sleep quality in hemodialysis patients. The statistical population of this study included 90 male and female patients referring to the center of Sari for hemodialysis. The criteria for entering the study include consenting to participate in the research; dialysis treatment at least two times a week, at least 3 months, and 18 years of age and older. Exit criteria also include known psychiatric disorders, diabetes mellitus, urticaria, Myomia or fibroma; menorrhagia; history of gastrointestinal bleeding; mental disorders; heart failure; coronary artery stenosis or myocardial infarction; systolic blood pressure less than 90 mm Hg and substance abuse. Urtica dioica nettle pepper with Netanyon 400 mg brandy. Based on at least 3.1 milligrams of chlorogenic acid in each tablet made from the dried extract of the leaf of the nettle of the nettle plant by Barij Essen, it is used 3 times a day for 3 months in this study.
