Effect of semi sitting and supine position on serum levels of inflammatory factors in patients after appendectomy

Protocol summary

Summary

Target: Comparison of the effect of semi sitting and supine position effect on serum levels of inflammatory factors after appendectomy in Dezful large hospital and Imam Ali(AS) Hospital of Andimeshk in 2014. Inclusion criteria: All patients with the diagnosis of acute appendicitis underwent appendectomy based on the history, physical examination and paraclinic findings, and absence of underlying disease that causes high inflammatory factors before surgery. Exclusion criteria: Patients with diabetes, patients who had normal appendix. In this study, 120 patients by blocked randomization will be put into four groups (each group consisted of 30 people). The first intervention group patients after surgery in the supine position will receive three doses of antibiotics, In the second group of patients after surgery in the supine position will receive one dose of antibiotics, The third group of patients after surgery with three doses of antibiotics will have a semi-upright position and Four patients in the intervention group after surgery with a dose of antibiotics will have a semi-upright position. Then all of them will be evaluated 2 hours before, and 2 and 24 hours after surgery for inflammatory markers (CRP, ESR, leukocytes, and neutrophils) using blood samples, as well as temperature. The expected outcome of the study are the average amount of WBC, ESR, CRP, neutrophil and temperatures in the four groups at 24 hours after surgery.

Scientific title

Effect of semi sitting and supine position on serum levels of inflammatory factors in patients after appendectomy

Public title

Effect of semi sitting position on inflammatory factors after appendectomy

Purpose

Supportive

Inclusion/Exclusion criteria
Inclusion Criteria : All patients on the basis of history and physical examination and laboratory findings; the diagnosis of acute appendicitis underwent appendectomy be; People aged 10 to 50 years; Not addicted to drugs; there is no underlying disease that is caused by elevated inflammatory markers before surgery; Consent to participate in the study and blood; having full consciousness baseline; If the body's inflammatory factors in sample 2 hours before and 2 hours after surgery are higher than normal. Exclusion Criteria : Diabetes; cancer; patients who had normal appendicitis; Patients with a history of previous infections and antibiotic use during the past week, a history of allergy to cephalosporins; Patients receiving immunosuppressive such as corticosteroids and cytotoxic drugs or taking anti-inflammatory drugs; Patients release from the hospital earlier than 24 hours.

Intervention groups

1

Description

1)The first intervention group patients after surgery in the supine position and will receive three doses of antibiotics as directed by physician and 2 Hours, 2 and 24 hours after surgery for inflammatory markers CRP, ESR, leukocytes, neutrophils will be evaluated using blood samples, as well as temperature.

Category

Prevention

2

Description

2)In the second intervention group patients after surgery in the supine position and will receive one dose of antibiotics as directed by their physician and 2 Hours, 2 and 24 hours after surgery for inflammatory markers CRP, ESR, leukocytes, neutrophils will be evaluated using blood samples, as well as temperature.

Category

Prevention

3

Description

3)In the third study, patients received three doses of antibiotics after surgery, according to the doctor and have a semi-upright position and 2 Hours, 2 and 24 hours after surgery for inflammatory markers CRP, ESR, leukocytes, neutrophils will be evaluated using blood samples, as well as temperature.

Category

Prevention

4

Description

4)In the fourth study, patients after surgery with a dose of antibiotics will have a semi-upright position and 2 Hours, 2 and 24 hours after surgery for inflammatory markers CRP, ESR, leukocytes, neutrophils will be evaluated using blood samples, as well as temperature.
