Clinical Trial Comparison Between Lidocaine And Magnesium sulfate On Pain Of Interavenous Etomidate In Patients Undergoing Any Type Of Surgery With General Anesthesia Except Cesarean Section

Protocol summary

Summary

This study is a randomized double-blind clinical trial. The aim of this study is comparison between lidocaine and magnesium sulfate on pain of interavenous etomidate in 99 patients 18-60 years old undergoing any type of surgery except cesarean section. Patients with Neuromuscular disease, Heart disease, epilepsy, pregnancy, receiving pain medications in twenty-four hours before surgery and thrombophlebitis will be excluded. Patients are randomly divided into three groups. The patients are not aware of the type of drug which received and evaluation of patients is performed by anesthesiologist who does not know about the protocol of the study. Anesthesia induction in three groups is identical and with 0.3 mg/Kg of etomidate. First group before injection of etomidate receives 2.48 mmol (60 mg) intravenous magnesium sulfate diluted in 2 mL of saline. Second group before injection of etomidate receives 30 mg of lidocaine 1% diluted in 2 ml of saline. Third group before injection of etomidate receives 5 ml of saline. After injection of etomidate injection site pain in patients will be assessed with 4 point ambesh scal.

Scientific title

Clinical Trial Comparison Between Lidocaine And
Magnesium sulfate On Pain Of Interavenous Etomidate
In Patients Undergoing Any Type Of Surgery With
General Anesthesia Except Cesarean Section

Public title

The Effect Of Lidocaine And Magnesium Sulfate On Pain
Of Interavenous Etomidate

Purpose

Prevention

Inclusion/Exclusion criteria

Inclusion criteria: Age range 18-60; Patients undergoing surgery with The anesthetic etomidate except for cesarean section. Exclusion criteria: Neuromuscular diseases; Heart disease; Epilepsy; pregnancy; Receiving pain medications in twenty-four hours before surgery; Thrombophlebitis; Neurological and psychiatric disorders.

Age

From **18 years** old to **60 years** old

Gender

Both

Phase

2

Groups that have been masked
