

Clinical Trial Protocol

Iranian Registry of Clinical Trials

18 Jun 2026

The effect of Respiratory muscles resistance training and Specific respiratory muscle training on physical and pulmonary function in patient with asthma.

Protocol summary

Summary

Objectives: We aimed to assess the effect of exercise training program on respiratory muscle strength and exercise on pulmonary function and respiratory muscles, especially the health of asthmatic patients. Study design: Quasi-experimental pretest - posttest study with experimental and control groups. Study population: the population of the study, all women will be diagnosed with asthma during the years 2006-2013 who have admission due to coronary artery diseases. Inclusion criteria: age between 30- 55 years old; history of asthma over two years and exclusion criteria: musculoskeletal problems; disability; pregnancy; cardiovascular disease or serious diseases that interfere with their exercise. Sample size: 23 women with asthma. Methods: samples by randomly were placed in one of three groups; 1- Respiratory muscles resistance exercise training(doen weight training movement including lift, fly, bench press, lat pull down, crunch, rowing), 2- Specific respiratory muscle training(inhale against the resistance by using a especial device) and 3- control group. The trainings were performed for 8 weeks.

Scientific title

The effect of Respiratory muscles resistance training and Specific respiratory muscle training on physical and pulmonary function in patient with asthma.

Public title

The effect of resistance and specific training in patient with asthma

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria were: age between 55-30 years old, History of asthma over two years. Exclusion criteria:

musculoskeletal problems; disability; pregnancy; cardiovascular disease or acute diseases that interfere with the exercise.

Age

From **30 years** old to **55 years** old

Gender

Female

Phase

Health conditions studied

1

Description of health condition studied

asthma

ICD-10 code

J45

ICD-10 code description

Asthma

Primary outcomes

1

Description

respiratory function

Timepoint

8 weeks before and after the intervention.

Method of measurement

spirometry

2

Description

physical function

Timepoint

8 weeks before and after the intervention.

Method of measurement

strength and endurance muscle

Secondary outcomes

empty

Intervention groups

1

Description

The control group did not cause any interference

Category

Rehabilitation

2

Description

Specific respiratory muscle training (inhale against the resistance by using a special device) . This training can be done up to 50% of maximum strength of respiratory muscles

Category

Rehabilitation

3

Description

Respiratory muscles resistance training (doing weight training movement including lift, fly, bench press, lat pull down, crunch, rowing) that performed in The three sets of 8-12 repetitions

Category

Rehabilitation
