Scientific title

Effect of education through multimedia and text messaging on psychologicall parameters (stress, anxiety, depression) of patients candidate for coronary angiography

Public title

Effect of Short Message Service (SMS) and Multimedia training on psychological parameters in patients

undergoing coronary angiography

Purpose

Supportive

Inclusion/Exclusion criteria

Inclusion criteria: Age limit of 25 to 75; Lack of psychological disorder and psychological therapy on the basis of a psychologist advice; Lack of previous angiography ; dont be the health care system staff ; Ability to receive messages via their mobile phones; literate have; Exclusion criteria: Before performing invasive procedures such as angiography, the other located transesophageal echocardiography; history of use psychiatric drugs ; The elimination of those who are not willing to keep taking part in the survey.

Age

From **25 years** old to **75 years** old

Gender

Both

Phase

N/A

Groups that have been masked

No information

Sample size

Target sample size: **120**

Randomization (investigator's opinion)

Randomized

Randomization description

Blinding (investigator's opinion)

Double blinded

Blinding description

Placebo

Not used

Assignment

Parallel

Other design features

The study is done based on three groups of patients undergoing elective angiography (two groups with Sms and Multimedia training and a control group)

Secondary Ids

empty
