Clinical trial the effect of training on the attitude and knowledge of the anesthesia and operating room nursing students about teamwork

Protocol summary

Summary

The study of the effect of education on teamwork skills the purpose of this interventionist study is to evaluate the effect of education on the attitude and knowledge of the students of anesthesia and operating room related to teamwork. The participants of this study are the junior and senior students of anesthesia and operating room in bachelor degree who are willing to participate in this study. They would be omitted from the study, if they participated in similar studies, or they were transferal and guest students, or they did not participate in all of the educational sessions. The sample of this study is to students who are divided randomly into control and experimental group, each with 35 students. The students of each group complete the questionnaires of attitude and knowledge of teamwork skills. Intervention for the experimental group involves two workshop sessions related to teamwork in form of lecture, group discussion, movie and scenario play. The time lag of workshop sessions is a week. Control group receives no education. Immediately after the intervention and 3 months after the first session, questionnaires will be completed again by the students of each group. The expected result in this study will be the created changes in the attitude and knowledge of students related to teamwork.

2

Description
Intervention group: Two workshop sessions will be held, each of which in 4 hours. In the first workshop, after the expression introduction and objectives of the workshop, it will be discussed about the significance of the teamwork for the patient's safety and the reduction of clinical mistakes. In the second workshop, using group discussion and role play, these instruments will be studied more and will be educated through movie play. By the same token, three scenarios will be presented and same questions will be discussed related to each scenario (scenarios have been designed using review of literature and according to real situations). All of the principles of education will be considered in the workshops. One person as a researcher assistant helps

to hold the workshop in two sessions.
