Health conditions studied**1****Description of health condition studied**

menopausal

ICD-10 code

N95

ICD-10 code description

Menopausal and other perimenopausal disorders

Primary outcomes**1****Description**

Hotflashes

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the hotflashes score will multiply to 4.

2**Description**

Paraesthesia

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the paraesthesia score will multiply to 2.

3**Description**

linsomnia

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the insomnia score will multiply to 2.

4**Description**

Nervousness

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the nervousness score will multiply to 2.

5**Description**

Melancholia

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the melancholia score will multiply to 1.

6

Description

Vertigo

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the vertigo score will multiply to 1.

7

Description

Weakness

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the weakness score will multiply to 1

8

Description

Arthralgia or myalgia

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the arthralgia or myalgia score will multiply to 1.

9

Description

Headache

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the headache score will multiply to 1.

10

Description

Palpitations

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the palpitations score will multiply to 1.

11

Description

Formication

Timepoint

Before intervention and in first, second and third month after intervention

Method of measurement

Scoring is from 0 to 3 according to: not at all (0), a little (1), quite a bit (2), Extremely (3). then the formication score will multiply to 1.

Secondary outcomes

empty

Intervention groups

1

Description

Control group: no intervention will take on them and do not take piascledine.

Category

Treatment - Drugs

2

Description

Case group (number1): will take one piascledine 300 mg pill daily, during three months. piascledine should be used with food and a glass of water.

Category

Treatment - Drugs

3

Description

Case group (number2): will take two piascledine 300 mg pill daily, during three months. piascledine should be used with food and a glass of water.

Category

Treatment - Drugs
