Health conditions studied

1

Description of health condition studied
The relationship between the teaching of emotional intelligence component on emotional intelligence scale, learning approach and level of anxiety in nursing students

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description
Emotion intelligence

Timepoint
Before the intervention, immediately and one month

after intervention

Method of measurement
Schering emotion intelligence questionnaire

2

Description
Learning approach

Timepoint
Before the intervention, immediately and one month after intervention

Method of measurement
The questionnaire Study Process

3

Description
Anxiety level

Timepoint
Before the intervention, immediately and one month after intervention

Method of measurement
Spielberger Anxiety Inventory

Secondary outcomes

empty

Intervention groups

1

Description
Perform educational intervention in experimental group through 2 session (8 hours) with interactive methods.

Category
Other

2

Description
The control group is with no intervention. Schering emotional intelligence, Spielberger anxiety and Study Process questionnaires at the beginning of the first session and one month after the end of sessions completed by students and at the end booklets of training sessions are available to the control group.
