The effectiveness of mindfulness based cognitive therapy on craving, rumination and relapse prevention for heroin abusers treating with methadone

Protocol summary

Summary

Aim: The main aim of the present research is to find the effectiveness of Mindfulness Based Cognitive Therapy (MBCT) on craving, rumination and relapse prevention for heroin abusers treating with methadone. The present study was a clinical trial including pre and post-tests as well as two months follow-up phases. All subjects were selected from a main population which referred to a treatment Center in the city of Arak. From those, 36 patients with heroin abusers treating with methadone and without acute mental disorder were randomly selected and divided into two the two control (N= 20) and experimental groups (N= 16). All subjects were requested to fill in The Obsessive Compulsive Drug Use Scale (OCDUS) and Ruminative response scale (RRS) in the pre and post-tests as well as in the follow-up phases. Then, The MBCT program were coduvted for the experimental group (eight sessions) while the control group has not received it.

Scientific title

The effectiveness of mindfulness based cognitive therapy on craving, rumination and relapse prevention for heroin abusers treating with methadone

Public title

The effectiveness of mindfulness on addiction

Purpose

Treatment

Inclusion/Exclusion criteria

inclusion criteria: heroin abuser; treating with methadone exclusion criteria: acute mental disorder

Age

From **20 years** old to **60 years** old

Gender

Male

Phase
N/A
Groups that have been masked
No information
Sample size
Target sample size: **36**
Randomization (investigator's opinion)
Randomized

Health conditions studied

1

Description of health condition studied
addiction
ICD-10 code
f55
ICD-10 code description
abuse of non-dependence-producing substances

Primary outcomes

1

Description
Craving and Rumination
Timepoint
befor, after and 2 months follow up
Method of measurement
Craving and Rumination Questionnaire

Secondary outcomes

empty

Intervention groups

1

Description
Control group: don't received any intervention
Category
N/A

2

Description
Experimental group: Mindfulness Based Cognitive Therapy (MBCT)
Category
Behavior
