A comparative study of the therapeutic effect of the propolis Vaginal cream and clotrimazole On Candida vulvovaginitis in reproductive aged women referring to shiraz gynecology clinics (2009

Protocol summary

Summary

This study was carried out to compare the effect of Propolis vaginal cream with Clotrimazole on the treatment results of candidiasis vulvovaginitis . The subjects consisted of reproductive aged women (above 18 years and in premenopause age) who were not pregnant. From the viewpoint of clinical complaints and laboratory culture, all the patients were diagnosed to be afflicted. If the subjects were not considered patient according to the culturing were eliminated from the study. This clinical trial was conducted on 100 reproductive aged women for a period of 8 months .They were divided into two groups of 50 subjects(Clotrimazole and Propolis) by randomized allocation method. all the patients applied the drug once a day for 10 days only. The results were compared after 10 days of therapy and reculturing.
