Comparison of effect of vocal function exercises and chewing as methods of improving voice production in teachers of exceptional schools

Protocol summary

Summary

With due attention to prevalence of voice disorders in teachers and importance of prevention of this disorders; This research shows the most effective techniques to improve the voice of teachers and the prevention of voice disorders. Inclusion criteria: Acquireing VHI score below 14/5; Non smoking; Not having voice or damage laryngeal disorders; Aged between 40-26 Exclusion criteria: A day treatment program not doing; Affected with voice problem Such as: aphonia and have a cold 30 female teachers of special schools that have inclusion criteria participate in this study. They randomly divided into two groups breathing and Acoustic analyses of each subjects voice done two time within 28 days. During these 28 days, the participants of two groups doing determined exercises (Chewing exercises and vocal functional exercises) and then respiratory acoustic variables such as: fundamental frequency; frequency jitter; frequency range; maximum phonation time and S to Z ratio , are analyzed and compared with each other.

Health conditions studied

1

Description of health condition studied

Prevention of Voice Problems

ICD-10 code

Z50-5

ICD-10 code description

Speech Therapy

Primary outcomes

1

Description

Fundamental Frequency

Timepoint

Before and 28 days after intervention

Method of measurement

praat Softwaret

2

Description

Frequency Jitter

Timepoint

Before and 28 days after intervention

Method of measurement

praat Software

3

Description

Frequency Range

Timepoint

Before and 28 days after intervention

Method of measurement

praat Software

4

Description

Maximum Phonation Time

Timepoint

Before and 28 days after intervention

Method of measurement

Stopwatch

5

Description

S to Z sound ratio

Timepoint

Before and 28 days after intervention

Method of measurement

Stopwatch

Secondary outcomes

empty

Intervention groups

1

Description

Examination group1: Vocal functional exercise:
Sustaining / i / as long as possible on a comfortable note,
Glideing from the lowest to the highest note in the
frequency range,using/o/, Glideing from the highes note
to the lowest note in the frequency range,using /o/,
Sustaining the musical notes middle C and D,E,F,andG
above middle C for as long as possible,using/o/ , each
experimental group performe the exercises two times
each day,with two repetitions each time,during 28 days

Category

Prevention

2

Description

Examination group2: Chewing training: Talking with the person on the need for more open mouth while talking, instructioning exaggerated chewing , production of nonsense syllables like (Van, Dan, Da) with chewing, , Using word and phrases to practice chewing, Thinking to chewing, each experimental group performe the exercises two times each day,with two repetitions each time, during28 days
