

Clinical Trial Protocol

Iranian Registry of Clinical Trials

16 Sep 2026

Effect of an educational program based on Teach-Back method on adherence to treatment regimen in patients with end stage renal disease.

Protocol summary

Summary

The aim of this clinical trial was to determine the effect of using teach-back education on the treatment adherence of patients with end stage renal failure. In this randomized clinical trial, 90 patients with end stage renal Disease and undergoing hemodialysis who referred to Sina Hospital , Tehran at 2016 were divided into two groups. In the intervention group, in addition to routine training, teach-back method education in four dimensions of hemodialysis, medication, fluid intake and diet, for 45 min was performed. In the control group, training was only as routine training .Treatment adherence were evaluated in 3 steps including pre-test, post-test (7 days after the intervention), and fallow-up (30 days after the intervention), by using end stage renal disease adherence questionnaire. Age, sex, educational level and duration of hemodialysis in both groups were identified.

Scientific title

Effect of an educational program based on Teach-Back method on adherence to treatment regimen in patients with end stage renal disease.

Public title

Effect of an educational program based on Teach-Back method on adherence to treatment regimen in patients with end stage renal disease.

Purpose

Supportive

Inclusion/Exclusion criteria

Inclusion criteria: The definitive diagnosis of kidney disease and hemodialysis patient : Age over 18 years : tendency to participate in the study ability to reading and writing : Non-acute disease or acute kidney failure : No other chronic diseases such as stroke, myocardial infarction and malignant tumors : lack of cognitive impairment, speech and hearing Exclusion criteria : unwillingness to continue to cooperate in the study : cognitive impairment, speech and hearing : feet or

transfer the patient to a medical facility

Age

No age limit
