Health conditions studied

1

Description of health condition studied

Non specific low back pain

ICD-10 code

M54.5

ICD-10 code description

Low back pain

Primary outcomes

1

Description

Pain intensity

Timepoint

Before intervention, fourth session, after intervention,
three month after intervention

Method of measurement

Numeric assessment of pain intensity

2

Description

Psychological distress

Timepoint

Before intervention, fourth session, after intervention,
three month after intervention

Method of measurement

DASS-21

3

Description

Functional disability

Timepoint

Before intervention, fourth session of intervention, after
intervention, three month after intervention

Method of measurement

Mouris questionair of functional disabiity

Secondary outcomes

empty

Intervention groups

1

Description

Group intervention: 15 people randomly placed in
groups. in this Group 6 with 10 sessions of physiotherapy
done hypnotherapy session. During the hypnotherapy
treatment is performed for 60 minutes before physical
therapy. At its first meeting the required measures are
