

Clinical Trial Protocol

Iranian Registry of Clinical Trials

16 Sep 2026

Determination the effect of regular physical activity on public health and social health in male nursing students.

Protocol summary

Summary

Objectives: The main objective of the project: The effect of physical activity on general and social health
Secondary objectives: 1-Comparison of general and social health in nursing students before and after intervention in control group 2-Comparison of general and social health in nursing students before and after intervention in intervention group 3-Comparison of general and social health in nursing students before and after intervention in control and intervention groups
Study design: The population was nursing students in Hamedan University of medical science.in this study students selected in Randomized controlled- examination groups, non-blind, uncontrolled by placebo and single center. Implementation: 60 nursing students from different education terms in Randomized selected to intervention (30 students) and control (30 students) groups. Entrances criteria: boys nursing student's age between 18 to 24, verification by exercise physiology specialist proportion of cardiovascular and physical fitness with exercise protocol and students who have no heart and diabetes disease and mental disorders. Exclusion criteria: student who three consecutive sessions, or a quarter of their training sessions was absent or participated in other exercise programs removed. Interventions: students in intervention group participated in FITT exercise protocol is focusing on upper body muscles. The main outcome variable is increase the level of general and social health in students.

Intervention groups

1

Description

Intervention group: Intervention group 8 weeks exercise program 3 sessions per week and a total of 24 sessions and duration with 20 to 60 minutes each session according to American Academy of Sports Medicine Protocol (AASM) and using the FITT Sports Edition. Exercise duration about 20 to 60 minute according to the FITT protocol include F= Frequency: The number of training in 8 weeks and 3 sessions per week. I = Intensity: intensity is practice to evaluate practice intensity of the maximum heart rate and used the FOX formula as follows Heart Rate max: $220 - \text{age}$. In this protocol according to American Academy of Sports Medicine guidelines intensity should be between 50 to 75% maximum heart rate and exercise sessions gradually increased (2 percent per week). When intolerance or exercise-based fatigue seen in who sports, exercise activities kept constant. It is important in these who exercise and intensity should be hold below the maximum heart rate and avoided from severe intensity exercise. For evaluate the exercise intensity in the intervention group, measure and calculate the heart rate taught before and after exercise and at rest. In this way

they touch the second and third fingers on the radial artery and pulse rate calculated in 15 seconds and multiplication to 4 and number of Heart Rate in one minute calculated and documented in the related table. T = time: duration of time in each exercise session and calculated by protocol of AASM. According to this protocol each session begin from 20 minute and gradually increase to 60 minute. Duration the time in the each session increase to 5 minute and maintained in this level when arrive to 60 minute. T= type: The type of exercise choice for this group, in addition to being safe, should be easily donned at Home. Aerobic exercise is a series of stretching exercises focusing on the upper body (shoulders, arms and chest). Exercise stages including: first 10 to 5 minute warm-up and slow walk and gentle stretching motion. Then 15 to 20 minutes aerobic exercise walking in moderate intensity. Also stretching motion and specific movements of the arm and shoulder every week and increase from 20 to 40 minutes s. finally a cooling phases lasting about 5 to 10 minutes. In total exercise duration beginning from 40 minutes and gradually arrives to 60 minutes, and then maintain in this level.
