Comapairing the Weight gaining of Two Groups of Swaddled and not Swaddled Premature Infants Hospitalized in Neonatal Intensive Care Unit

Protocol summary

Summary

This study aimed to determine the effect of swaddling on weight gain in premature infants between 32 to 37 weeks gestational age and weighing 1000 to 2500 g, and aging more than 72 hours, hospitalized in the neonatal intensive care unit. This study is a clinical trial and quasi-experimental study. The sample size for each group is considered 30. Samples will be selected by simple sampling and randomly placed in two groups. According to the study conditions samples will be matched and then placed in order one in case and next in control group. Neonates in case group during 5 days of hospitalization will be swaddled 5 times a day and each time for 30 minutes by researcher with cotton cloth in Frog Flexible way. Samples in control group will receive routine care. The infant will be excluded if his parents at any time and for any reason want so or there is physiological instability. The weigh of neonates in both groups will be measured and recorded in the morning without any clothing and before feeding, by the responsible nurse of each neonate with seca digital scale. The rate of weight gain between two groups will be compared.

Scientific title

Comapairing the Weight gaining of Two Groups of Swaddled and not Swaddled Premature Infants Hospitalized in Neonatal Intensive Care Unit

Public title

The Effect of Swaddling on Weight gaining of Premature Infants

Purpose

Supportive

Inclusion/Exclusion criteria

Inclusion criteria: Premature infants with gestational age of 32 to 37 weeks; Weight of 1000 to 2500 grams at the start of study; Infant age more than 72 hours; Normal

physiologic parameters; Infants with no severe cardio_respiratory, sepsis, metabolic diseases and any indication for surgery. Exclusion criteria: At any time if parents want to exit their baby from study; Infants who are not stable.

Age

From **3 days** old to **28 days** old

Gender

Both

Phase
