

Clinical Trial Protocol

Iranian Registry of Clinical Trials

18 Sep 2026

Effect of pain control on patients' satisfaction in patients with extremities trauma

Protocol summary

Summary

Objectives: To compare the effect of two methods of controlling and non-controlling pain in extremity trauma patients admitted to the emergency room triage. Design: Randomized, single-blind, single-center, phase II clinical trial. Performance: pain will be controlled in one group and will not be controlled in the other. Inclusion criteria included patients with extremity trauma. Exclusion Criteria included patients who have stomach ulcers and Mental diseases. Interventions: In the first intervention group the pain is controlled and in the second intervention group the pain is not controlled. The main outcome: Rate of patients' satisfaction.

Scientific title

Effect of pain control on patients' satisfaction in patients with extremities trauma

Public title

Survey the effect of pain control in patients with extremities trauma in triage room on the outcome and patients' satisfaction

Purpose

Prevention

Inclusion/Exclusion criteria

Inclusion criteria included patients with extremity trauma. Exclusion Criteria included patients who have stomach ulcers and Mental diseases.

Age

No age limit

Gender

Both

Phase

2

Groups that have been masked

No information

Sample size

Target sample size: **100**

Randomization (investigator's opinion)

N/A

Randomization description

Blinding (investigator's opinion)
Not blinded

Blinding description

Placebo
Not used

Assignment
Parallel

Health conditions studied

1

Description of health condition studied
extremities trauma

ICD-10 code
M 12.5

ICD-10 code description
Transient arthropathy

Primary outcomes

1

Description
Patient satisfaction of extremity trauma

Timepoint
After controlling pain

Method of measurement
Based on feedback from patients

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: control pain in triage room. Patients in the intervention group receive 0.05 mg/kg morphine sulfate.

Category

Treatment - Drugs

2

Description

Control group: Without control pain in triage room. Patients in control group received distilled water.

Category

Treatment - Drugs
