Health conditions studied

1

Description of health condition studied

Extragenital wart

ICD-10 code

A63.0

ICD-10 code description

Anogenital (venereal) warts

Primary outcomes

1

Description

The disappearance of or going Warts

Timepoint

At baseline, two weeks and, if no improvement up to 5 times in the Cryotherapy group

Method of measurement

Examination by dermatologist

Secondary outcomes

1

Description

Side effects, Such as erythema, pain and local irritation

Timepoint

2-5-7 week

Method of measurement

Physical examination

Intervention groups

1

Description

In group one, Cryotherapy was done with cotton swab dipped into liquid nitrogen and then applied on the warts for 5–20 seconds every week. If there is no improvement, Cryotherapy therapy was done once every two weeks and would be repeated up to five times.

Category

Treatment - Drugs

2

Description

In group two, 40% salicylic acid at the same illness that Cryotherapy is one to three other warts that are based on randomly selected was applied on the dry lesions with a cotton swab once daily for 8 weeks done. Both methods were done by a dermatologist.

Category

Treatment - Drugs
