

Clinical Trial Protocol

Iranian Registry of Clinical Trials

07 Jun 2026

A randomized placebo-controlled double blind study to evaluate intradermal vaccination in hepatitis B healthy carriers to eliminate virus

Protocol summary

Summary

HBsAg positive patients would be referred from laboratories in all over Guilan state and would be evaluated for Inclusion and Exclusion criteria. These subjects will be allocated to study groups using simple randomization. Cases receive six monthly doses of hepatitis B recombinant vaccine (Heberbiovac HB) in Intradermal (id) form. Controls receive no vaccine but normal saline as a placebo. We will compare cases with controls according to their response to vaccination. The response to vaccination is defined as loss of HBsAg and appearance of anti-HBs, loss of HBeAg, undetectable HBV-DNA and persistence of normal ALT levels in the post vaccination period.

Scientific title

A randomized placebo-controlled double blind study to evaluate intradermal vaccination in hepatitis B healthy carriers to eliminate virus

Public title

The efficacy of specific hepatitis B virus (HBV) vaccination, in Intradermal form, in healthy carriers of HBV to eliminate virus

Purpose

Treatment

Inclusion/Exclusion criteria

Including hepatitis B healthy carriers (positive HBsAg with normal alanine transaminase level). Excluding D.M or other autoimmune diseases, chronic or serious medical diseases, malnutrition, positive for anti-HIV, anti-HCV and Anti-HDV, pregnancy, receiving any antiviral medication, alcohol intake daily, refusing to give informed consent and so increase in ALT or getting a serious disease during the project and volunteer refusing to continue.

Health conditions studied

1
Description of health condition studied
Hepatitis B
ICD-10 code
ICD-10 code description

Primary outcomes

1
Description
undetectable HBV-DNA
Timepoint
6th month and 12th month
Method of measurement
PCR

2
Description
loss of HBsAg and appearance of anti-HBs
Timepoint
6th month and 12th month
Method of measurement
ELIZA test

Secondary outcomes

1
Description
clinical situation and possibly side effects
Timepoint
monthly
Method of measurement
clinically
