Effect Of Stapler Line Reinforcement On Complications Of Laparoscopic Sleeve Gastrectomy

Protocol summary

Summary

Effect Of Stapler Line Reinforcement On Complications Of Laparoscopic Sleeve Gastrectomy. Nowadays Laparoscopic Sleeve Gastrectomy (LSG) is utilized more often for management and treatment of morbid obesity. However, Despite having significant benefits, it has potential serious complications. Prevention is the best and cost effective way of controlling these complications although there is controversy among surgeons. Patient will be study with BMI (Body Mass Index) of 40 or more and no history of diabetes mellitus and/or pulmonary Disease. Patient Hypoxia; Hypoalbuminemia will be excluded from study. 100 patients were selected and randomly divided into 2 groups; first group underwent Stapler Line Reinforcement and another group had operation without stapler line reinforcement. We Compared the following complications between the two groups: leaking from operation zone, Bleeding and stenosis that need intervention, And if it worths to spend more time in theater and sedate longer due to stapler line reinforcement. Worth of Longer sedation and operation time due to stapler line reinforcement

Scientific title

Effect Of Stapler Line Reinforcement On Complications Of Laparoscopic Sleeve Gastrectomy

Public title

Effect Of Surgical Line Reinforcement On Complications Of Laparoscopic Sleeve Gastrectomy

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion Criteria: Patient with BMI (Body Mass Index) upon 40
Exclusion Criteria: uncontrolled diabetics, uncontrolled cardiopulmonary disease, untreated psychological condition, hypoxia, hypoalbuminemia.

Age

No age limit

Gender

Both

Phase

N/A

Groups that have been masked

No information

Sample size

Target sample size: **200**

Randomization (investigator's opinion)

Randomized

Health conditions studied

1

Description of health condition studied

Morbid Obesity

ICD-10 code

E66.8

ICD-10 code description

other obesity

Primary outcomes

1

Description

Decreasing leakage

Timepoint

3th 15th days post operation

Method of measurement

Gastrographin and physical examination

2

Description

Decreasing bleeding

Timepoint

first day after surgery

Method of measurement

Hematocrit and drain output

Secondary outcomes

1

Description

Increasing stenosis

Timepoint

3th day post operation

Method of measurement

Gastrographin study

2

Description

Time consuming

Timepoint

During operation

Method of measurement

Operation time

Intervention groups

1

Description

Intervention: Stapler Line Reinforcement in surgical zone
with suture

Category

Prevention

2

Description

Control: staple line without suture

Category

Treatment - Surgery
