comparison the effect of telenursing and not follow-up in caregiver of heart failure patients on self-care behaviors and clinical status of patients

Protocol summary

Summary

Objectives: this study has been performed with the aim of investigating the effect of telenursing in caregivers of heart failure patients on patient's self-care behaviors and clinical parameters. Design: this not blinded randomized clinical trial was performed among 66 heart failure patients that referred to clinic of Abadan Taleghani hospital. Sitting and conduct: Heart failure patients with inclusion criteria that referred to clinic were randomly assigned to control, intervention- group 1 and intervention- group 2 by table of random numbers. Participants: class II and III of heart failure patients with 40 years old or greater Interventions: caregivers did not receive any intervention in control group, caregivers were received verbal education in intervention- group 1, and continuum phone follow-up plus verbal education in intervention- group 2. Main outcomes: self-care behavior, fatigue severity, exercise tolerance and dyspnea severity of patients were assessed by self-care behavior questionnaire, fatigue severe scale, six minutes walking test and dyspnea Borg scale at baseline and end of 3 months.

Health conditions studied

1

Description of health condition studied

Heart Failure

ICD-10 code

150.9

ICD-10 code description

Cardiac, heart or myocardial failure NOS

Primary outcomes

1

Description

Self-care behavior

Timepoint

Before intervention- 3 months after intervention

Method of measurement

Self-care behavior in heart failure questionnaire

Secondary outcomes

1

Description

Exercise tolerance

Timepoint

Before intervention-3 months after intervention

Method of measurement

Six minutes walking test

2

Description

Dyspnea

Timepoint

Before intervention-3 months after intervention

Method of measurement

Dyspnea Borg scale

3

Description

Fatigue

Timepoint

Before intervention-3 months after intervention

Method of measurement

Fatigue severe scale

Intervention groups

1

Description

Intervention- group 2: Receive educational plan and continuum phone follow-up

Category

Rehabilitation

2

Description

Intervention- group 1: Receive educational plan
