The evaluation of the effect of Azithromycine on inflammatory and fibroblastic part of Cyclosporine (CsA) induced gingival overgrowth in renal transplanted patients with and without scaling

Protocol summary

Summary

Objective: The evaluation of the effect of Azithromycine (AZM) on inflammatory and fibroblastic part of Cyclosporine (CsA) induced gingival overgrowth in renal transplanted patients with and without scaling Design: randomised controlled clinical trial, One blinded (data analyzer) Inclusion criteria: transplanted patients with systemic use of CsA; more than 18 year old; existing upper and lower 6 teeth of anterior segment; gingival overgrowth in grade 1 based on King Index; plaque index more than 10% Exclusion criteria: hypersensitivity for macrolid antibiotics; not having stable renal function; having any periodontal treatment after transplantation; local irritation in Maxiillary and Mandibular anterior teeth; Oral breathing; smoking 24 patients are randomized (randomly selection numbers` Software) in 2 groups. Group1: the patients received a 5 day Azithromycine AZM regimen without scaling (two 250 milligram capsules of AZM at first day that followed with 1 capsule in 4 days). Group2: at first visit , they will be received a professional supra and subgingival scaling with ultrasonic cavitron and will be prescribed AZM (the same way as group 1) after 2 months. The results will be evaluated in weeks 4 and 8 in group1 after prescribing AZM and in weeks 4,8,12,16 in group2 . Primary outcome variables: gingival overgrowth Secondary outcome variables: clinical crown length; gingivitis; dental plaque; probing depth

Scientific title

The evaluation of the effect of Azithromycine on inflammatory and fibroblastic part of Cyclosporine (CsA) induced gingival overgrowth in renal transplanted patients with and without scaling

Public title

Effect of Azithromycine (AZM) on gingival overgrowth

Purpose
Treatment

Inclusion/Exclusion criteria
Inclusion criteria: transplanted patients with systemic use of CsA; more than 18 year old; existing upper and lower 6 teeth of anterior segment; gingival overgrowth in grade 1 based on King Index; plaque index more than 10% Exclusion criteria: hypersensitivity for macrolid antibiotics; not having stable renal function; having any periodontal treatment after transplantation; local irritation in Maxiillary and Mandibular anterior teeth; Oral breathing; smoking

Age
From **18 years** old

Gender
Both

Phase
3

Groups that have been masked
No information

Sample size
Target sample size: **24**

Randomization (investigator's opinion)
Randomized

Randomization description

Blinding (investigator's opinion)
Single blinded

Blinding description

Placebo
Not used

Assignment
Parallel

Other design features
Randomaised Controlled Clinical Trial

Health conditions studied

1

Description of health condition studied

gingival enlargement

ICD-10 code

k06.1

ICD-10 code description

gingival fibromatosis

Primary outcomes

1

Description

Gingival enlargement

Timepoint

Before intervention, 4,8,12,16 weeks after intervention

Method of measurement

Periodontal probe

Secondary outcomes

1

Description

Gingivitis

Timepoint

Before intervention, 4, 8, 12, 16 weeks after intervention

Method of measurement

Observation, periodontal probe

2

Description

Dental plaque

Timepoint

Before intervention, 4, 8, 12, 16 weeks after intervention

Method of measurement

observation, plaque disclosing tablet

3

Description

Clinical crown length

Timepoint

before intervention, 4, 8, 12, 16 weeks after intervention

Method of measurement

Periodontal probe

4

Description

Probing depth

Timepoint

Before intervention, 4, 8, 12, 16 weeks after intervention

Method of measurement

periodontal probe

Intervention groups

1

Description

control:Drug Two 250 miligram Azithromycine capsule at first day and then one 250 miligram Azithromycine capsule daily for 4 days

Category

Treatment - Drugs

2

Description

Intervention: Scaling Drug Two 250 miligram Azithromycine capsule at first day and then one 250 miligram Azithromycine capsule daily for 4 days

Category

Treatment - Other
