The effect of traditional medicine product Sofoofe Banafshe on the prevention of headaches in patients with migraine

Protocol summary

Summary

In this study, the effect of Persian traditional medicine product that is called Sofoof Banafshe is examined on migraine headaches. According to the traditional medicine resources, Sofoofe Banafshe includes Viola Odorata, Rosa Damascena and Corianderum Sativum powder with the same amount. This study is a double blind randomized clinical trial. This research is carried out at the clinic of the University of Medical Sciences on at least 86 patients with migraine. The diagnosis of migraine is confirmed by a neurologist based on the criteria of IHS (International Headache Society), and then the patients are divided into two groups. Patients in the intervention group are receiving propranolol 20 mg twice daily plus Sofoofe Banafshe capsules 500 mg three times a day for a month, and patients in the control group are receiving propranolol 20 mg twice daily plus placebo capsules 500 mg three times a day that included starch powder for a month. Variables, duration, severity and frequency of headaches per week is evaluated in the beginning and at the end of the second week and the fourth week by using a standard questionnaire and VAS criterion. SF36 quality of life questionnaire for patients is completing at the same time. finally the data are analyzed.

Health conditions studied

1

Description of health condition studied

migraine

ICD-10 code

G43

ICD-10 code description

Use additional external cause code (Chapter XX), if desired, to identify drug, if drug-induced.

Primary outcomes

1

Description

The number of migraine attacks per week

Timepoint

Two weeks and one month after intervention

Method of measurement

Self made questionnaire

2

Description

Severity of headache

Timepoint

Two weeks and one month after intervention

Method of measurement

VAS

3

Description

Frequency of headaches

Timepoint

Two weeks and one month after intervention

Method of measurement

Self made questionnaire

Secondary outcomes
